# Call for Papers

The PTS Fibre Symposium will be held this year from 26.-27. November at the Penck Hotel (formerly art'otel) Dresden. This two year PTS Symposium focuses on bringing together fibrous materials, their preparation and use in different value chains. Not least because of this, the PTS Fiber Symposium will be an industry get-together with up to 100 participants from research and industry.

The objective is to present innovative technologies for the production of novel paper products and fibre composites. Developers, engineers, graduates and companies will be able to present their latest innovations in the form of presentations, posters or demonstrators.

Thematically, the PTS Fibre Symposium 2019 focuses on pulps for papers and composites for packaging, printing and technical applications. Therefore we look forward to submitting topics:

- Pulping and bleaching of lignocelluloses
- Innovative stock preparation concepts for paper
- Methods of fiber modification for enhancing properties of papers and composite materials
- Opportunities and procedures for strength improvement of papers
- Alternative fibres and feedstocks for paper materials
- Use of functional fillers
- Papers as composite materials
- Fibre composite materials in the wet-laid process
- Novel methods for the characterization of fiber and paper properties
- Paper as material - modeling the material behavior of paper and composites

## Einsendung & Format:

- Submission until **15.08.2019**
- Meaningful summaries in German and English
- Maximum one A4 page per language
- Indication of authors and companies involved
- Send your summary to:
  - Dr.-Ing. Tiemo Arndt: [tiemo.arndt\(at\)ptspaper.de](mailto:tiemo.arndt(at)ptspaper.de)
  - Dr. Martin Zahel: [martin.zahel\(at\)ptspaper.de](mailto:martin.zahel(at)ptspaper.de)

Questions & information you will receive by e-mail [academy@ptspaper.de](mailto:academy@ptspaper.de)
